

## Whitepaper

Diamond-anchored digital value for real-world trust and long-term alignment.

v1.0 (Draft)

Ethereum ERC-20

Initial Supply: 1,000,000

18 decimals

**Markus Goffin****Founder & Vision Lead — DIA-10**

35+ years in jewelry & diamonds, brand building, and international trade.

## Executive Summary

DIA-10 proposes a diamond-inspired digital asset designed to combine a clear scarcity signal with modern, auditable token rails. The project targets practical utility (access control, governance experiments, staking) and a transparent brand narrative.

**Utility** Access to gated resources, staking, governance pilots

**Tokenomics** Initial 1,000,000 DIA-10; future minting via on-chain governance (no hard cap)

**Roadmap** NFT tie-ins, crowdfunding rails, optional RWA bridges

## Problem

Retail users and partners need assets that are simple to understand, auditable, and culturally resonant. Many tokens lack credible narrative, brand discipline, or clear long-term alignment.

## Solution

DIA-10 pairs a diamond-anchored story with transparent issuance, published wallets/treasury policies, and community-first distribution—prioritizing trust, clarity, and utility over hype.

## Tokenomics

**1,000,000**

Initial DIA-10 supply at TGE

### Governance-mintable

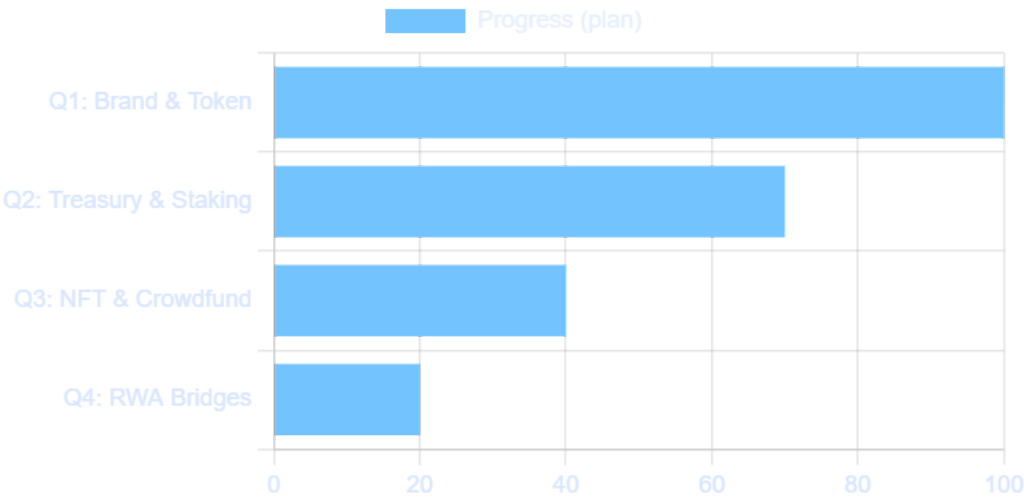

No hard cap; any future issuance requires on-chain vote & public policy

**18**

Decimals

# Roadmap

# Market Opportunity

# Founder Profile

Markus Goffin – visionary, strategist and innovator with 35+ years across

# Intellectual Property & Project Ownership

DIA-10 — the concept, brand name, logo design, token narrative and associated materials — was conceived and initiated by Markus Goffin. Unless otherwise licensed or transferred by written agreement, all associated IP rights remain with the founder and authorized project entities.

Antwerp and Israel underpin a resilient global network.

He founded/grew MODEGO, AMORE DUE® and DORA®, managed CI/marketing for renowned brands, directed trade-show campaigns, and introduced sales trainings that materially lifted profitability.

Continuous education spans diamondology (Antwerp), gemology (Idar-Oberstein), goldsmithing, watchmaking, marketing, web design, and corporate consulting—enabling concept-to-market leadership.

With DIA-10, Markus fuses real-world value knowledge with blockchain tooling—aiming for a transparent, durable digital asset inspired by the scarcity and timelessness of diamonds.

- Brand & Identity      Strategy, CI, narrative discipline
- Global Trade      Supply-chain & vendor relations
- Innovation      Product, IP, go-to-market
- Web3      Token design, governance, community
