Whitepaper

Diamond-anchored digital value for real-world trust and long-term alignment.

v1.0 (Draft)   Ethereum ERC-20   Initial Supply: 1,000,000   18 decimals

Markus Goffin
Founder & Vision Lead — DIA-10
35+ years in jewelry & diamonds, brand building, and international trade.

Executive Summary

DIA-10 proposes a diamond-inspired digital asset designed to combine a clear scarcity signal with modern, auditable token rails. The project targets practical utility (access control, governance experiments, staking) and a transparent brand narrative.

Utility   Access to gated resources, staking, governance pilots

Tokenomics   Initial 1,000,000 DIA-10; future minting via on-chain governance (no hard cap)

Roadmap   NFT tie-ins, crowdfunding rails, optional RWA bridges

Problem

Retail users and partners need assets that are simple to understand, auditable, and culturally resonant. Many tokens lack credible narrative, brand discipline, or clear long-term alignment.

Solution

DIA-10 pairs a diamond-anchored story with transparent issuance, published wallets/treasury policies, and community-first distribution—prioritizing trust, clarity, and utility over hype.

Tokenomics

1,000,000

Initial DIA-10 supply at TGE

Governance-mintable

No hard cap; any future issuance requires on-chain vote & public policy

18

Decimals

Offering Overview

Type	Convertible Participation Certificates (CPC)
Price baseline P0	EUR 0.10 per unit
Investor discount	20% (effective price Pn EUR 0.08, floor EUR 0.05, cap EUR 0.15)
Soft/Hard cap	EUR 50,000 / EUR 250,000
Min/Max ticket	EUR 100 to EUR 10,000
Payment methods	SEPA / SWIFT bank transfer

Roadmap

CPC launch, press kit, initial Academy content

Academy courses cohort 1, token economics finalization

Q3 2025

Q1 2026

Q4 2025

Q2 2026

Verify v1, payment ops, partner onboarding, KPI dashboard

TGE readiness, security review, closed beta for utilities

Certificates record the pledge and investor identity. After successful campaign close and settlement, CPCs

convert to DIA-10 tokens at TGE using the effective price P_n within floor and cap bounds. Verification is public
via the Verify page using the embedded payload hash.

Roadmap

Timeline example; dates and scopes may evolve with community input.

Market Opportunity

Intellectual Property & Project Ownership

DIA-10 — the concept, brand name, logo design, token narrative and associated materials — was conceived and initiated by Markus Goffin. Unless otherwise licensed or transferred by written agreement, all associated IP rights remain with the founder and authorized project entities.
